PRTU-IP-SWITCH
Price IP Switch

Typical System Configuration

The PRTU-IP-SWITCH is a plug-and-play Ethernet switch used to expand available connections for BACnet routers and additional network devices. All five ports automatically configure their data rate and accommodate a straight-through or crossover cable using the Auto-MDIX protocol.

FEATURES

+ Displays Power and Ethernet status via diagnostic LED

+ Plug-and-play operation

+ [5] shielded RJ-45 Ethernet Port 10/1000 Mbps

+ Automatic port speed configuration

+ DIN-rail mounting

+ UL 508, c-UL, CE
