

WIRELESS THERMOSTAT

Position in the best possible location for optimal temperature control

Whether installed on a brick or glass wall, the new Wireless Thermostat from Price Electronics provides accurate system control anywhere in the occupied space. This is extremely useful when the existing thermostat is inconveniently placed.

The Wireless Thermostat will connect to all of the new-generation Price controls, including the Price Intelligent Controller (PIC) for zone control and the Prodigy Smart Diffuser.

Key Wireless Thermostat features:

- Up to 5 year battery life
- FCC and IC certified wireless module
- Range up to 50 feet through standard walls
- Matches existing Price Thermostats for a consistent look
- Off-the-shelf user-replaceable batteries (AA lithium batteries recommended)
- Simple field setup (Set DIP switches identical on Dial Thermostat and Receiver)
