

FCVC / FCVE: Concealed and Exposed Vertical Fan Coil

Vertical Fan Coils are a welcomed addition to our Fan Coil product family.

These factory assembled, vertical blow-through fan coils are designed for concealed (FCVC) ducted installations furred into walls or exposed (FCVE) floor mounted applications without ductwork. Suitable for projects such as hotels, condominiums, nursing homes, and general commercial applications, these vertical fan coil units have the following features:

- Available in seven sizes with nominal air flow ranges from 200 to 1200 cfm.
- AHRI 440 certified and ETL safety certified to UL 1995 Standard by Intertek Testing Laboratories.
- 4-pipe configurations have up to five rows and can be selected for pre-heat or re-heat.
- Available with a variety of options, including factory mounted controls, liners, paint colors, and stainless steel drain pans.
- Removable fan and motor deck for easy servicing.
