

# CAPABILITY STATEMENT COVID-19 EMERGENCY RESPONSE SUPPORT

**Price Industries** is one of the largest manufacturers and suppliers of air distribution products in North America. With 4 manufacturing facilities in the United States and 5 in Canada, Price Industries can build and ship 95% of its products on 2, 5 and 10 day quick-delivery programs. We have been in business for over 75 years and remain a privately owned firm. Price has 25 offices (manufacturing and sales), 3,000 employees and over 100 engineers on staff. Our core competencies in Healthcare and Federal markets include renovations, expansions, new construction, master plans, peer review, equipment replacement, and more.

## FEDERAL

Price has a proven record of helping various federal agencies create facilities that are safe, secure, flexible, reliable, redundant, and energy efficient. Our federal work includes many open-ended government contracts that meet anti-terrorism/force-protection requirements.

## MANUFACTURING

All our US and Canadian manufacturing operations have achieved ISO 9001:2015 certification.

## HEALTHCARE

**Price Critical Environments** products are specifically designed for use in critical, clean spaces including hospitals, operating rooms, compounding pharmacies, and cleanrooms. We have been involved in a number of COVID-19 related **H2HC projects, primarily focused on converting existing patient rooms or hotel rooms to negative pressure isolation rooms with our portable exhaust Fan Filter Units (FFU)**. Considerable quantities can be shipped in 2 - 5 days upon receipt of order.

**Price / Antec Controls** products are utilized in various critical spaces. Specific to the COVID-19 outbreak, we supply **room pressure sensors, room pressure monitors and critical space controllers on A2HC projects** using our Pace™ Controller, Multi-Variable Monitor (MVM), and SRPS. Antec Controls Room Pressure Monitor (PM) can be applied in H2HC projects to monitor room pressure and can be shipped in 2 days from order. Our critical controls products are tested in our NVLAP-Accredited testing laboratory and our pressure monitors meet ASHRAE 170 room pressure monitoring requirements for Isolation Rooms. Our modular A2HC setup can be applied for any number of spaces or zones.

**Price Noise Control** products are utilized in various building applications to address excessive equipment noise. Price has supplied duct silencers & fan enclosures on A2HC projects which attenuate radiated, discharge and intake noise created by emergency exhaust fans. Our Noise Control products comply with relevant ASTM guidelines and are tested in our NVLAP-Accredited testing laboratory. We offer assistance with acoustic analysis design for any COVID-10 related project. Considerable quantities can be shipped in 2 - 5 days upon receipt of order.

### PRODUCTS, SERVICES & CAPABILITIES

- + Air Distribution Products (Grilles, Registers, & Diffusers)
- + Air Moving Products (VAV & Fan Powered Terminals)
- + Fan & Blower Coils
- + DOAS Fan-Powered Terminals
- + Healthcare Products (Fan Filter Units & Operating Room Ceiling Systems)
- + Lab Products (Venturi Valves, Room Pressure Monitors & Controls)
- + Noise Control Products (Silencers, Acoustic Panels & Acoustic Louvers)
- + Chilled Beams
- + Displacement Ventilation
- + Underfloor Systems
- + Controls
- + Computational Fluid Dynamics (CFD)
- + Virtual Reality (VR)
- + Laboratory catalogue-data testing
- + Mock-up in-situ testing
- + Acoustic Analysis design assist
- + Energy modeling & room design
