- BACnet Router (routes BACnet devices to the IP Router)
- IP Switch (allows expandability to system)
- Components factory mounted, wired, and tested panel ready for install

### TRENDING

SMS and Email notifications for alarms

### ACCESS PRICE CONTROLS FROM THE INTERNET

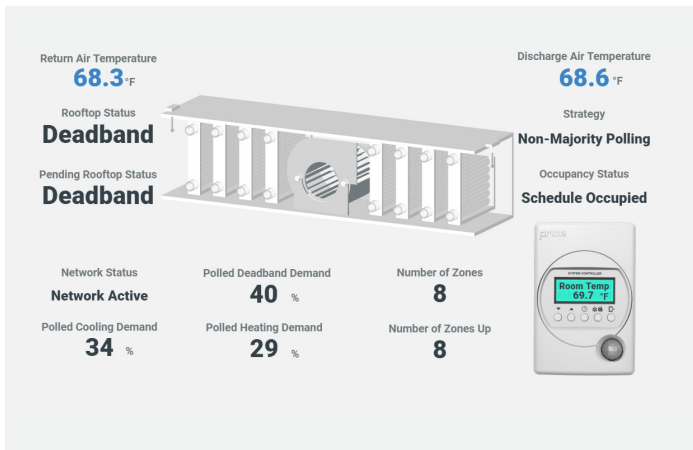

The Disio Cloud Building Management System (BMS) is used to remotely and securely monitor your HVAC equipment in commercial buildings.

The cloud based BMS allows you to log into Disio Cloud from [www.disio.io](http://www.disio.io). The standard subscription package has the ability to handle up to 3000 points with available cloud space for up to 24000 points. Disio Cloud supports trending, alarms, and high-resolution graphics. For example; log into your site before your next service call, or check on a trend to see the status of a rooftop or VAV box.

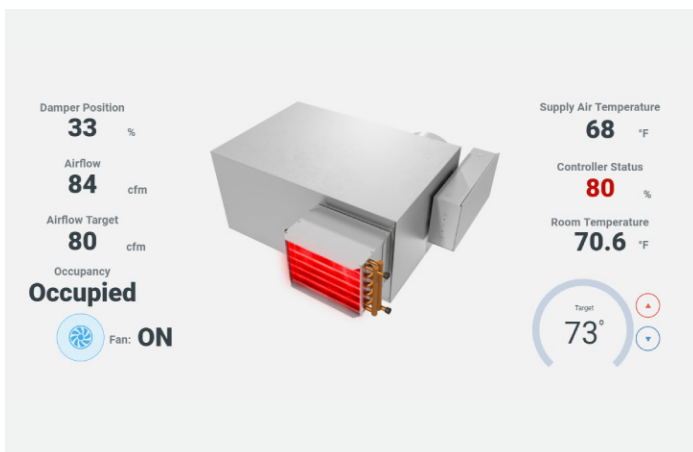

Disio Cloud can be used to monitor Price BACnet equipment as well as 3rd party BACnet devices.

Visit the Disio website at [www.disio.io](http://www.disio.io) for the latest information and graphics.
