Remote Aerosol Injection Port (INJ)
FFU, LFDC, RFDC, FRFDC
REMOTE AEROSOL INJECTION PORT (INJ)

INSTALLATION & MOUNTING INSTRUCTIONS

Kit includes:
- INJ ceiling access door
- Ceiling panel
- Mounting Frame (HGMF)
- Ceiling panel hold-down clips
- Aerosol flexible tubing
- Rubber grommet

Installation Instructions

STEP 1
Choose a location for the INJ ceiling access panel. Be sure to locate the INJ ceiling access panel such that the tubing can reach from the INJ ceiling access panel to the ductwork.

STEP 2
Install the mounting frame in the chosen ceiling opening. Hang using 12 ga. suspension wire as per ASTM C636 or secure to framing. If using suspension wire, do not twist the wires (bend in loose 180 degree loops) until the grid has been leveled (Figure 2).

STEP 3
Drill a 7/8" hole into the ductwork upstream of the diffuser.

STEP 4
Slide the grommet onto the black tubing at least two (2) inches from the end of the tubing. Install the tube into the hole in the ductwork using the grommet.
REMOTE AEROSOL INJECTION PORT (INJ)

INSTALLATION & MOUNTING INSTRUCTIONS

STEP 5
Install ceiling panel on mounting frame using hold-down clips (Figure 3).

STEP 6
Bring the other end of the tubing to the ceiling access door. Attach the tube to the barbed fitting on the ceiling access door before installing the ceiling access door (Figure 4).

STEP 7
Aerosol injection can now be completed using the exposed 3/8-18 NPT Female Thread. Aerosol injection and testing should be completed in accordance with IEST standards.

STEP 8
For access to the ceiling plenum, open the 1/4 fasteners to disengage the ceiling access door. Be careful to keep the tubing intact on the barbed fitting (Figure 5).
