

AIR DISTRIBUTION THEORY, APPLICATION & BEST PRACTICES

LOCATION: PRICE TECHNICAL CENTER - ATLANTA, GA

PROFESSIONAL DEVELOPMENT HOURS: 24

ARRIVAL DATE: MONDAY, SEPTEMBER 17 (PRIOR TO 4:00 PM)

TRAINING DATES: SEPTEMBER 18-21, 2018

The Price Engineers Training (PET) class will equip you with the tools and expertise to design successful spaces. Over 2,500 engineers have completed this industry renowned program, hosted in state-of-the-art facilities.

Class sessions will focus on air distribution fundamentals and applications of the Price product offering. These interactive sessions solve real-world design challenges using Price's All-In-One Engineering Software where applicable. Classes are augmented by dynamic displays, flow visualization and hands-on product interactions. Engineers that complete this program will leave with a superior understanding of foundational air distribution theory and the application of new technologies.

Due to limited availability, we prefer that participants are available to participate in entire four-day course. Please apply early to help secure a spot.

LEARNING OBJECTIVES

HVAC Fundamentals:

- + Air Distribution
- + Acoustics
- + Comfort
- + Green Technologies

Technology:

- + Displacement
- + Chilled Beams
- + Critical Environments
- + Noise Control
- + Terminals, Fan Coils
- + Underfloor
- + Terminals with DOAS

Applications:

- + Labs/Cleanroom
- + Healthcare
- + Education

Presented by industry leading professionals, your training will be augmented by static & dynamic displays that illustrate product application, performance and function.
