

CORE

Developed in conjunction with Weave radiant textile panels by PARC, Core provides an effortless install and access system to perfectly coordinate Weave panels. Core simplifies setting out the panels for the installer by creating predefined grids that accommodate our innovative torsion spring system and provides easy access for future planned maintenance work.

LIGHTWEIGHT AND EASY INSTALL

- Core mounting system ships with hardware pre-installed and assembly holes pre-drilled
- With its lightweight aluminium construction, Core can be mounted to deck using standard threaded rod or similar hangers
- Low profile design
- Access cables and torsion springs provide safe and efficient install

SIMPLIFIED MAINTENANCE

- Easy to access panels, even with a continuous ceiling plane
- Torsion spring system allows for quick mount and demount to access ceiling void
- Hinge system allows drop down of panels while maintaining spacing and orientation

VISUAL COMPATIBILITY

- Compatible for installations of Weave or Soft Cells acoustic panels, side by side
- Visual consistency maintained between active and inactive panels throughout ceiling
